

Lake Copper Very Scarce.

There is no accumulation of Lake copper at the Lake. In fact there is no manufactured copper here at all, says a report from Houghton, Mich. There may be 650,000,000 pounds of copper accumulated somewhere in this land or across the sea, as stated on the authority of the New York Journal of Commerce and Commercial Bulletin, but it is positively the truth that the Lake copper is not in hiding anywhere around this district. In fact there has not been such a scarcity of saleable copper here in three years.

Shipments which total 1,000,000 pounds were made here last week and cleaned up everything in sight.

These shipments were made direct to domestic consumers, with the exception of two cars which were marked for export to London. These cars contained copper specially designed for tubing.

Yesterday morning President and Manager A. M. Conard of the Sonora Copper Company, returned to Cobro Grande, the mining camp owned by his company, where he is now ready for a smelter, which it is said will in the very near future be erected. A party of about a dozen stockholders chaperoned by Auditor Reed of Kansas City, Mo., accompanied Manager Conard to Cobro Grande, on a tour of inspection.—Border Vidette.

Yuma is experiencing a building boom. On Main street at the present time the big three-story cement block of E. F. Sanguinetti is nearing completion at a cost of a good many thousands of dollars. The new cement building of J. W. Dorrington on Second street, will be finished within a few days. There is at least a dozen residences and small buildings under way in different sections of the city.
